

## Predictive Widget

with iFace Technology from BTBP

Learn to prevent skin problems  
before they happened.

Find your clients breakouts and teach them where to clean/apply cream to avoid acne. Check your clients face for danger zones and teach them how to use your products to keep the chances of getting acne low. We can predict where wrinkles will develop over time using just a selfie. Use this information to help your clients choose your products to avoid fine lines, deep lines and sagging.

## How to use this widget

- 1 **Subscribe to license**
  - Contact [customer@btbp.org](mailto:customer@btbp.org)
- 2 **SDK(Software Development Kit) will be provided**
